

Wreaths

What you'll need:

- Lolly pop sticks
- PVA glue or glue dots
- Paper plate
- Scissors

Lollypop sticks

1. Using a round paper plate draw a circle on the plate. Cut out the hole in the centre leaving a generous flat surface that allows the sticks to naturally sit level on the back of the plate.
2. Paint the plate a nice background colour that matches your craft stick palette. Let dry.
3. Start laying out your craft sticks around the paper plate. Start by placing sticks in the 12, 3, 6, and 9 o'clock positions. Glue the sticks down placing a dab of PVA glue or a glue dot on the back of each stick. Align the tip of the stick with the edge of the centre hole.
4. Continue filling in the remaining spaces and gluing your sticks down, making sure the sticks are pointing to the centre of the wreath.
